

## Why AcellFX®?

Because you deserve the best treatment available. AcellFX® is designed for comfort and has shown to reduce inflammation, promote healing and produce overall improved visual outcomes.

Eye drop regimens and treatments requiring multiple applications can be costly and uncomfortable, yielding minimal results. With AcellFX®, many patients require just one treatment, and experience multiple benefits.

### AcellFX Acellular Amniotic Membrane.

### AcellFX® Patient Benefits

- *Fast, easy application*
- *Comfortable, reduces inflammation*
- *Pain reduction*
- *Reduces scarring*
- *Can accelerate the healing process*

Ask your doctor if AcellFX® is right for you. At AcellFX®, our number one goal is treating your eyes – naturally.

## What Exactly IS AcellFX®?

AcellFX® is an acellular amniotic membrane that treats your eyes the natural way. A safe, effective and FDA-registered biological graft, AcellFX® is designed to effectively repair eye disorders. If you suffer from ocular surface or corneal eye problems or conditions, AcellFX® may be the right treatment for you.

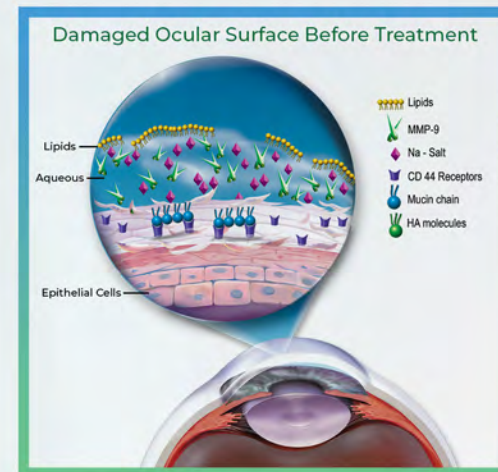

## What Does My Doctor Think?

Your doctor's number one priority is to provide you with the best treatment outcome possible – that's why your doctor trusts AcellFX®.

AcellFX® helps you heal by introducing the natural growth factors necessary to restore your eye to its natural state quicker and more effectively than many traditional treatments.

## How Does AcellFX® Work?

Think of it like a contact lens, but much, much thinner – and all natural. Quick and easy to apply, your doctor will place AcellFX® on your eye and then insert a contact lens to hold it in place. Your eye will naturally absorb AcellFX® – and its natural healing properties – promoting the healing process quickly and effectively.
